GLOSSARY

TECHNICAL GLOSSARY

WAVE TECHNOLOGY

	Cloud Wave New Wave, Maintain the Wave concept and feel, whilst making it softer and increasing comfort.		Fan-shaped Wave Wave technology which features various Wave heights, delivering excellent cushioning and stability.
	Parallel Wave Wave technology which uniformly disperses shock throughout the sole, providing excellent cushioning and enhanced stability.		Double Fan-shaped Wave Wave technology that gives the highest levels of support combined with excellent cushioning.
	Infinity Wave Wave technology with a more visible and effective construction. Two parallel plates that sit together with soft cushioning pillars in-between to provide unrivalled cushioning and improved durability by absorbing and dispersing the impact at foot strike.	A unique technology that combines the two key elements which make great running shoes - cushioning and stability. Mizuno have created a Wave to suit every type of runner. Running places stress on the body. The unique Mizuno Wave technology provides the right amount of cushioning and stability your body needs and blends these elements, creating a smooth and easy running experience.	

ALL SPORTS

	Inspired by nature, Wave is a unique midsole technology that provides both cushioning and stability. Wave's unique shape absorbs and disperses the impact at foot strike, which results in a smoother, more cushioned feel on every step.		ap+, a lightweight midsole compound offering rebound and cushion durability, providing a high level of comfort.
	The DynamotionFit system uses highly advanced motion capture and biomechanics technology. Mizuno has developed a design blueprint to engineer shoes that work with your foot throughout the gait cycle.	AIRmesh	Breathable and cool, AIRmesh allows each running shoe from Mizuno to maintain a high standard of breathability and comfort of the upper.
	Cool and Dry. Mizuno Intercool solves the problem of heat and humidity build-up in a running shoe. It does this by incorporating a full-length ventilation system in the sole of the shoe that removes heat and humidity from the foot through a system of ventilation channels.	Removable INSOCK	Removable insock for comfort and cushioning.
SR touch	An advanced lightweight cushioning material that absorbs shocks and keeps the transition smooth and fast due to its quick rebound properties.	Premium INSOCK	A high-grade removable insock for comfort and cushioning.

TECHNICAL GLOSSARY

RUNNING TECHNOLOGIES

	Durability and Traction. X-10 is an extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and gives more traction at the heel strike.		A lightweight midsole compound providing high level cushioning and rebound for energy efficient runs.
	XtaRide, Mizuno's technical trail concept featuring X lugs and Xta groove, leads to trail shoes that adapt to their surroundings and work in perfect harmony with the body.		Pebax® Powered Wave Plate for lightweight energy return
	G3, an advanced performance outsole component that enhances traction where needed most and reduces weight.		The Wave Plate is constructed with a bio-sourced Pebax Rnew® plate. This provides extremely lightweight support and energy return, empowering athletes with every step.
	A unique midsole compound providing high comfort and performance, while being extremely lightweight.		An evolutionary lightweight midsole that delivers stress-free cushioned rides with high rebounds. It gives an energised, euphoric and super-comfortable run.
	New, unique sole construction combining 2 different midsole compounds that help synchronise your body and movement.		An extra solid sheet rock-plate in the forefoot which provides superb protection against stones and rock.
	An original rubber compound developed by Michelin that provides more grip and comfort.		Waterproof, breathable fabric membrane upper technology.
	An engineered approach to minimise the rapid acceleration and deceleration of the foot during transition, creating the smoothest ride possible.		The pressure absorbing blown rubber outsole optimizes pressure distribution throughout the forefoot.

TECHNICAL GLOSSARY

FOOTBALL & RUGBY TECHNOLOGIES

	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.		Grippy insock material that stops the foot from sliding inside the shoe.
	Upper delivers a high level of softness and durability with a structured fit.		R-Fiber mesh controls the upper stretch and securely holds the foot during acceleration and turns.
	A unique midsole compound providing superb comfort and performance, while being extremely lightweight.		Highest kangaroo leather quality for premium comfort fit and natural ball touch.
	It is a revolutionary concept, with an integrated memory foam construction which controls three key performance characteristics: Fit, Stability and Touch.		

TENNIS TECHNOLOGIES

	A unique upper providing the highest level of softness and durability, while maintaining breathability.		A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.
	An exceedingly lightweight midsole material with excellent comfort and resilience properties.		Durability and Traction. X10 provides extremely durable Mizuno carbon rubber that allows for longer wear in high impact areas and provides more traction at the heel strike.
	Dynamotion Groove - an innovatively constructed outsole using specifically designed flex grooves to improve stability and on court agility.		

TECHNICAL GLOSSARY

INDOOR TECHNOLOGIES

	A specifically engineered diagonal groove in the midfoot area allows the player to turn at maximum speed and power by efficiently transferring natural body movement and shift in direction.		An exceedingly lightweight midsole material with excellent comfort and resilience properties.
	A performance outsole component that enhances traction where needed most.		Specifically designed flex grooves in the outsole to improve stability and on court agility.
	Dura Shield protects your toes and increases the product durability.		Super soft and durable synthetic collar lining insert which adds comfort and durability when using ankle braces.
	A shock-absorbing cushioning compound.		

TECHNICAL GLOSSARY

APPAREL TECHNOLOGIES

	Mizuno DryLite technology draws excess moisture away from the body, creating a comfortable and dry microclimate for best performance.		Mizuno FreshPlus technology adds an anti-bacterial and deodorising function to your garment, creating a fresher and odour reducing product.
	Mizuno Bodymapping technology provides enhanced air circulation inside the garment, keeping the body cool and dry.		Mizuno Dynamotion technology is based on anatomical research to create patterns that give improved garment fit and full freedom of movement.
	Mizuno's BIOGEAR is based on in-depth scientific research into the human exercise physiology and biomechanics. It helps to maintain body balance, improve performance and reduce the fatigue of muscles and joints during sport by controlling stretch, pressure and shape.		CoolTouch technology provides a soft feeling and leads to extremely quick drying.
	Mizuno ImpermaLite technology provides a performance blend of water and wind protection combined with superior breathability.		BlindStitch construction provides flat seams for anti-abrasion and enhanced comfort.
	NightLite, with its reflective material, provides superior retro reflection for low light running.		Breath Thermo is an extremely innovative thermal fabric yarn. It captures escaping body heat and, through a patented reaction in the yarn, generates heat-returning warmth to the body.
	BlackLite is a specifically engineered tone-on-tone reflective material that provides reflection for all occasions.		Mizuno Warmalite technology recycles body heat, creating an insulating warm layer between body and garment.
